

## IAS TAM Participation

Our IEEE IAS ISI Student Branch Chapter participated in the IAS Tunisian Annual Meeting (TAM), where we had the opportunity to engage with professionals, students, and other IEEE IAS members from across Tunisia. This event provided a platform to exchange ideas, showcase

our work, and contribute to shaping the future of IAS TAM.

What we participated with:

We took part in the Non-Technical Challenge, where we presented our vision for hosting the next IAS TAM, highlighting how we would organize an impactful and well-structured event with

the theme “Space Manufacturing and off-Earth Industrialization”

Additionally, we designed a poster showcasing our activities at IEEE IAS ISI, giving other Student Branches insight into our initiatives and achievements. We’ve successfully won the best

poster first place.

This experience allowed us to gain valuable feedback, exchange ideas with other SBs, and contribute to the planning of future IEEE IAS events.
