

InnoSphere Virtual Summit

The InnoSphere Virtual Summit brought together technology enthusiasts, professionals, and IEEE members to explore cutting-edge innovations and enhance technical skills.

The event featured diverse sessions covering key areas in engineering and design, fostering collaboration and knowledge sharing.

Highlighted Sessions:

- PCB Design (Session 1 & 2) – A step-by-step guide to designing printed circuit boards (PCBs),

covering schematic creation, layout design, and best practices for hardware development.

- 3D Modeling & Texturing (Session 1 & 2) – An interactive workshop introducing 3D modeling

techniques, texturing fundamentals, and real-world applications in design and animation.

- UI/UX Workshop (Session 1 & 2) – A deep dive into user experience (UX) and user interface

(UI) design principles, focusing on creating intuitive and visually appealing digital experiences.

The summit provided a platform for learning, networking, and fostering technical excellence, reinforcing

IEEE's commitment to innovation and professional development.
