

## Quantum Leap

Quantum Leap is an exciting event designed to empower tech enthusiasts, developers, and students with cutting-edge knowledge in three transformative domains: DevOps, Blockchain, and Mobile Development. Through hands-on workshops, expert-led sessions, and interactive

discussions, participants will gain valuable insights and practical experience to elevate their technical skills.

12

### Event Highlights: Three Dynamic Workshops

#### UNVEILING DEVOPS: THE SECRET TO FASTER, BETTER SOFTWARE DELIVERY

Learn how to streamline software development and deployment using DevOps methodologies.

This workshop covers CI/CD pipelines, automation, containerization with Docker, and orchestration with Kubernetes, enabling you to optimize workflows and enhance collaboration

between development and operations teams.

#### BASICS OF CRYPTOCURRENCY AND BLOCKCHAIN

Step into the world of decentralized finance and blockchain technology. Understand the fundamentals of cryptocurrencies, smart contracts, and distributed ledger systems. This workshop provides an essential foundation for anyone interested in blockchain applications, from fintech to Web3 development.

13

#### MOBILE DEVELOPMENT WITH FLUTTER

How to build cross-platform mobile applications using Flutter, Google's powerful UI toolkit.

This

hands-on session covers the fundamentals of Flutter development, including UI design, state management, and integrating APIs, allowing to create high-performance mobile apps for Android and iOS.
