

## Introduction to the Supply Chain

The training session covered an introduction to the Supply Chain world, including fundamental

concepts, the mindset of Supply Chain Management (SCM) professionals, and real-life cases of

supply chain crises. The session also explored how industries have navigated these challenges

and continue to adapt to evolving variables and demands.

## Speaker:

Mootaz Ben Zinouba led the session, bringing his expertise as a Master of Engineering in Mechanical Engineering (EUR-ACE® Accreditation). As a Supply Chain Specialist and an Aeronautics Enthusiast, he provided valuable insights into the complexities of supply chain management and its critical role in global industries.
